			ART UNIT 1794	PAPER NUMBER
			MAIL DATE 12/13/2007	DELIVERY MODE PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 09/242,191	Applicant(s) RIERA, MICHEL	
	Examiner Thao T. Tran	Art Unit 1794	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 28 September 2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 43-62 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 43-62 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☒ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

1. This is in response to the Amendment filed on 9/28/2007.
2. Claims 43-62 are currently pending in this application. Claim 62 has been amended.
3. In view of the prior Office action, the prior art rejections of the claims are maintained below.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 43-48, 50, 54-62 are rejected under 35 U.S.C. 102(b) as being anticipated by Bottomley et al. (US Pat. 4,506,223).

Bottomley discloses a method for chemical shift imaging (stereochemical deformation) using NMR (see title). The method involves the use of two pairs of coils 300 and 302 disposed outside the pipe holding the sample, one of the pairs rotates 90 degrees relative to the other pair (see Fig. 7a; col. 12, ln. 42-58), thus varying the angle formed by the intersecting magnetic fields generated by the two pairs of coils. The amplitudes of the magnetic fields are gradients (see abstract), meeting the requirement of the presently claimed invention.

The process uses selective RF pulses having variable frequency that is 90 degrees (see col. 4, ln. 57-63). As shown in Fig. 7a, it appears that the magnetic field plane forms an angle between the presently claimed range.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 49 and 51-53 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bottomley as applied to claims 43-48, 50, 54-62 above and in view of Heyden et al. (US Pat. 3,551,794).

Bottomley is as set forth above and incorporated herein.

Bottomley does not teach the use of a ferromagnetic core in the coils in the NMR system.

Heyden teaches an NMR system, wherein a ferromagnetic core in the coils is used to concentrate the magnetic flux in the direction of the flow (see col. 6, ln. 64-68). Therefore, it would have been obvious to one of ordinary skill in the art to have employed the coils with a ferromagnetic core, as taught by Heyden, in the process of Bottomley, for the purpose of concentrating thus enhancing the magnetic flux in the direction of the flow to improve the effectiveness of the process.

Response to Arguments

8. Applicant's arguments with respect to the rejection of the claims in the prior Office action have been considered but are found not persuasive.

In response to Applicants' argument that the chemical shift in Bottomley is not stereochemical deformation because the electron distribution partially shields a nucleus from the

applied static field that changes the Larmor frequency, it is noted that nevertheless the chemical shift due to a change in electron distribution is a stereochemical deformation.

In response to Applicants' argument that none of the pairs of coils of Bottomley rotates with respect to the other pair, it is noted that by teaching one coil set rotating around the cylindrical axis while another set is static, Bottomley does teach one set rotating with respect to another.

The same arguments apply over the combination of Bottomley and Heyden.

Conclusion

9. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thao T. Tran whose telephone number is 571-272-1080. The examiner can normally be reached on Monday-Friday, from 9:00 a.m. - 5:30 p.m..

Application/Control Number:
09/242,191
Art Unit: 1794

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Milton I. Cano can be reached on 571-272-1398. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
